How to use your cooler

1. Installation
   Put the fixed grip on one side of the mobile phone first, then pull the other stretchable grip of the cooler to fix the cooler on the back of the mobile phone and keep it as close as possible.

2. Power on
   Connect the charger and make sure the output power of the charger is 5V-3A or above.

3. Switch on the device
   The RGB indicator is on: the device is working.
   • The RGB indicator is off: the device is off.
   •
4. Install a Live Streaming Bracket
   Please use a standard bracket connector and screw it clockwise into the copper nut of the cooler, make sure it has been tightened to prevent it from falling off during use.

*When the cooler is working, its temperature will decrease rapidly, at this time, the hot air in the environment will condense into water droplets attached to the surface of the cooler when it meets the cool surface of the cooler, which is a normal phenomenon.

*When you stop using the cooler, please disconnect the power supply in time.
