How to use your cooler

Connector
for Bracket

Pull the side arms to fit your phone.

Configuring the cooler

1. Download and install the APP.

2. Install the cooler
- Before using, please remove the protective film on the bottom of the cooler, fix the cooler on the back of the phone, and keep it as close as possible. When installing, please avoid the buttons on the side of the phone.
- Connect the charger and make sure the output power of the charger is not less than 27W.

3. Switch on the cooler.
- Press and hold the on/off button, the RGB indicator will light up to indicate that the cooler has been turned on.
- Click the button to quickly switch between Silent, Smart, Overclocking cooling mode, long press again to turn off the clip.
- After power on, the cooler enters Bluetooth pairing mode. If no Bluetooth connection has been made, the indicator light will flash for 30 seconds, and then its light effect will return to the user setting or factory default mode, and the Bluetooth pairing mode will be on all the time.

4.(Optional)* Other settings.
- Turn on the Bluetooth of your mobile phone and connect the cooler in Shark Arsenal APP.
- You can set the cooler light effects, cooling mode, check cooler's temperature data, and firmware version update.

5.(Optional)* Mounting bracket for live streaming.
- Please use the standard bracket connector and connect the copper nut of the cooler in a clockwise direction, you need to make sure to tighten it to prevent it from falling off.

*The cooler is in overclocking mode by default.
*When the cooler is working, the temperature of the cooler surface is low, and when the cell phone is not installed, the hot air in the environment will condense into water droplets attached to the surface of the cooler when it is cold, or even icing, which are normal phenomena.
*If it is not used for a long time, please turn off the cooler in time to avoid the danger of air inlet blockage or high temperature.

Specifications
