How to install your cooler

• Before using, please remove the protective film on the bottom of the cooler and attach the cooler magnetically to the back of the device.

• For non-magnetic phone, please install the removable grips first before installing it on the phone.

Removable
Grips

Bracket
Interface

How to use your cooler

1.Download and install the Shark Arsenal app.

2.Power on the cooler.

• Connect the charger and make sure the output power of the charger is not less than 27W.

• Long press the power button to start the cooler.

• Click the button to quickly switch between Quiet, Smart, Overclocking mode, long press again to turn off the cooler.

• Indicator lights up means that the cooler is on.

*The cooler enters the Bluetooth pairing mode when power is on. If there has been no Bluetooth connection, the indicator light blinks for 5~10 seconds, then the light effect reverts to the user setting or factory default mode, and the Bluetooth pairing mode will be on all the time.

3.(Optional)* Configure the cooler.
• Turn on your phone's Bluetooth and connect the cooler in the APP.
• Set the cooler's light effects, cooling mode and view the cooler's temperature.
• If the cooler is not configured, its default mode is overclocking mode.
• When the cooler is working, its surface temperature decreases, and the hot air in the environment will condense into water droplets attached to the surface of the cooler when it is cold, which is a normal phenomenon.

4.(Optional)* Install removable grips.
• For non-Apple phones, you need to install the two included grips first. Align the grips with the mounting slots on both ends of the cooler and press down firmly, when you hear a "snap" sound, the installation is complete.
• To remove the gripper, push it out firmly from the bottom up to remove it.

5.(Optional)* Mounting bracket for live streaming.
• Use a standard bracket for live streaming, screw its connector clockwise into the copper nut of the cooler and make sure it is tightened to prevent it from falling off during use.
